Application # 12944

Date: _____

Account # _____

Service Order # _____

Meter # _____

Sewer App# _____

The undersigned hereinafter called the applicant is the owner of the property referred to below and hereby makes application for water service from Sammamish Plateau Water and Sewer District, hereinafter called the District, and in consideration that the said District install the service applied for and furnish water, the applicant agrees to pay for the same at the rate and in the manner as provided or to be hereafter provided and to abide by such other rules and regulation as may be made by resolution of the Board of Commissioners of said District. The applicant further agrees that the Water District shall have the right to change and collect such rates and enforce such penalties as may be provided by resolution of the said Board and to temporarily discontinue the service at any time without notice. And it is further agreed that in case the supply of water shall be interrupted or fail by reason of accident or any other cause whatsoever, the said District shall not be liable for damages for such interruption for any reasonable period of time be held to constitute a breach of contract on the part of the District or in any way relieve the applicant from performing the obligations of this contract. And the District, in consideration that the applicant pay the charges and the rates and abide by rules and regulations as herein set forth, agrees to install the service and furnish water to the premises herein described according to the terms and conditions hereof.

Water Pressure: The District's system has been designed to provide normal static water pressures between 35 and 115 pounds per square inch (psi), measured at the water meter. The particular pressure at any meter depends on the location of the meter in the system. The applicant assumes the responsibility to determine exact water pressure at his meter. Where pressure exceeds 80 psi, applicant should install an appropriate type pressure regulator with strainer at the house (Reference: Uniform Plumbing Code, 1997 Edition, Section. 608.3). If applicant desires higher pressure than is provided, it is the applicant's responsibility to install the facilities necessary to achieve the desired pressure.

Flow Rate: The standard water service and meter are sized to meet normal domestic household flow requirements. A larger meter and service connection may be necessary if higher flow rates are required (such as a sprinkler system, swimming pool filling, fire sprinklers, etc.).
